

Since 2007, JMG SECURITY SYSTEMS has been the security solutions provider for Pacific Premier Bank, one of the strongest performing, diversified, and fastest growing community banks in the nation.

Named both a 2014 Super Premier Performing Bank in California by the Findley Reports and having earned 5-Star Rating, the highest, from Bauer Financial, Pacific Premier provides business and consumer banking products through 15 full-service depository branches in Southern California since 1983.

Initially, the bank was handling all of their security in-house, as they grew, it became impractical to maintain the standard they felt necessary to protect all their interests. Impressed by JMG SECURITY SYSTEMS' like-minded commitment to unparalleled service, they reached out to JMG to be their security partner in 2007.

Working with Pacific Premier's Assistant VP for Facilities Management, Shalon Scott who was initially given the critical responsibilities of Security Director, senior agent Greg Greenfield and executive account

manager Melissa Fernandez provided Ms. Scott the guidance and expertise to take Pacific Premier's security to the next level.

Over the years, Pacific Premier has expanded from the original 7 branches to 15, and JMG has enabled their system to scale and take advantage of all pertinent, technology advancements in the security industry such as IP based video, Network Recording and Integrated Access Control.

In recent years we have worked with the bank's security team led by Rudy Ramirez, VP/Director of IT/ISO, to support all of Pacific Premier's security needs including intrusion and fire detection, video surveillance, access control and 24hr monitoring. And in the attached video, Mr. Ramirez shares his personal experience partnering with JMG over the years.

Each of our clients has a unique facility and business environment. At JMG SECURITY SYSTEMS it is our job to listen to our clients challenges and concerns so that we can provide them with a security systems that fits seamlessly into their day-to-day environment. Some of our clients require highly sophisticated

security solutions, while others have more straightforward needs. But one thing never changes—our 100% commitment to do whatever is necessary to ensure our clients are getting the best advice and support, whatever their security needs may be.
